

READING AND SLEEP PROJECT

Do you have a child aged 9-11?
Would they like to take part in a fun
online psychological experiment?

We are running a study to investigate how sleep may help children learn to read.

Children will be asked to take part in 3 sessions over 1-2 days online. The first session will involve measuring your child's reading via video call.

Each session should take no longer than 30 minutes and can be arranged at times to suit you.

If you would like more information and a link to sign up to the study, please email us at:
sleepandreading@leeds.ac.uk

**RECEIVE A £5 AMAZON VOUCHER
FOR PARTICIPATING!**
