Feedback from PCR meetings

I have noticed a good change in my child because of your efforts. Thank you.

\*\*\*\*\* is progressing and trying to learn. His confidence is also noticeable and he is now keen to learn more. The targets he needs to work on I will help at home too such as reading and spelling. Overall he has improved since his SEND support has started. Thanks for the hard work from the school team.

Thank you for your efforts with \*\*\*\*\*. I am happy with the plan you have for him.

\*\*\*\*\* has started showing interest in her reading. When we read she is showing curiosity and tries to anticipate what is coming next. She enjoys her interventions and hopefully this will be an advantage to her and help her overcome her struggles. She does enjoy her studies but she does need encouragement.
